

1. Grandeurs macroscopiques

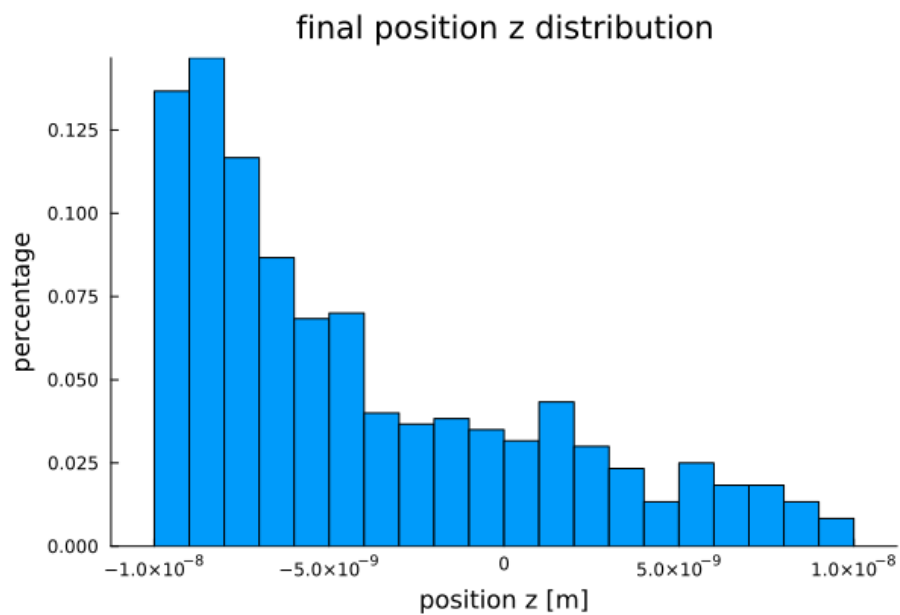

1.1 Température

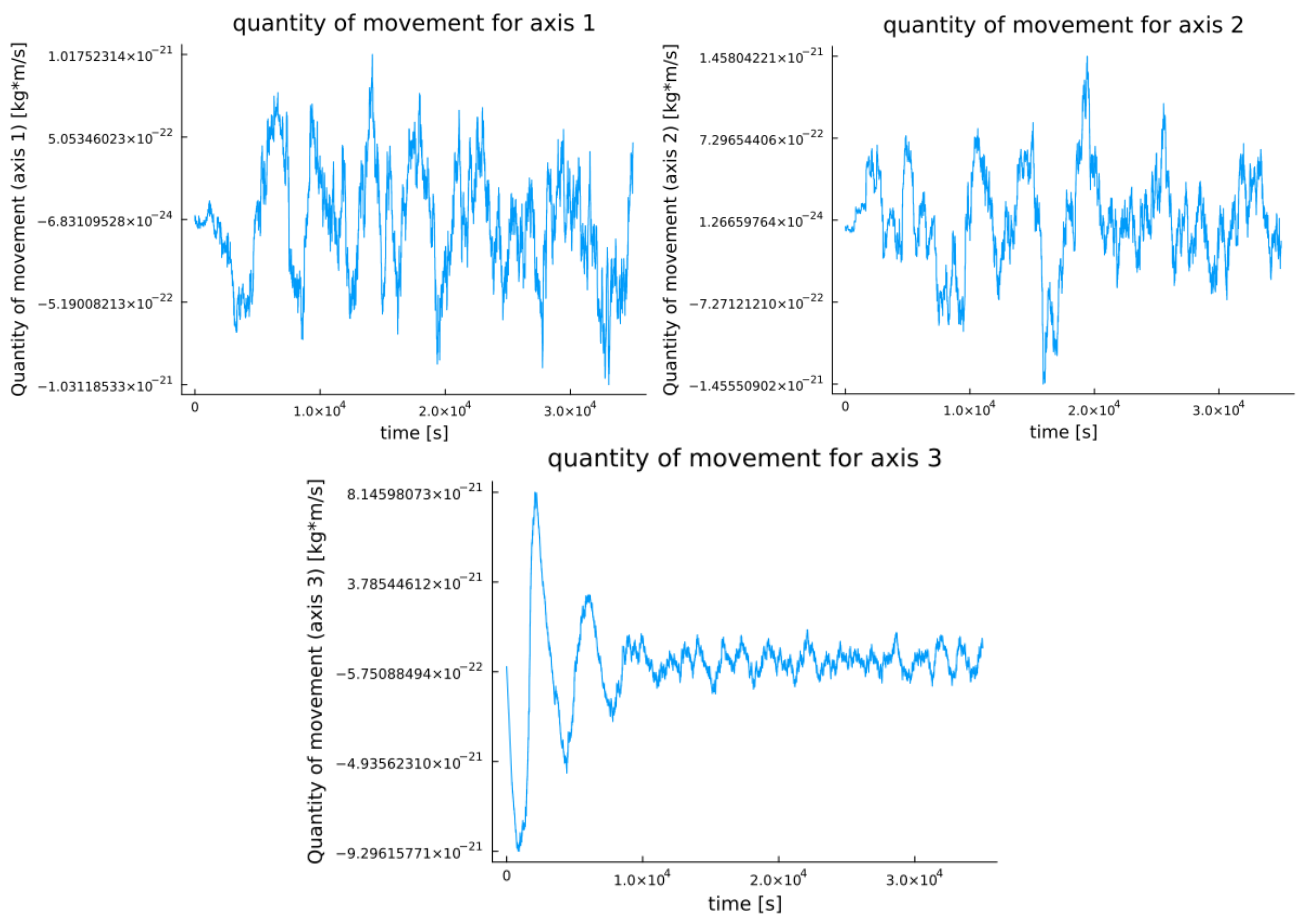

1.2 Pression

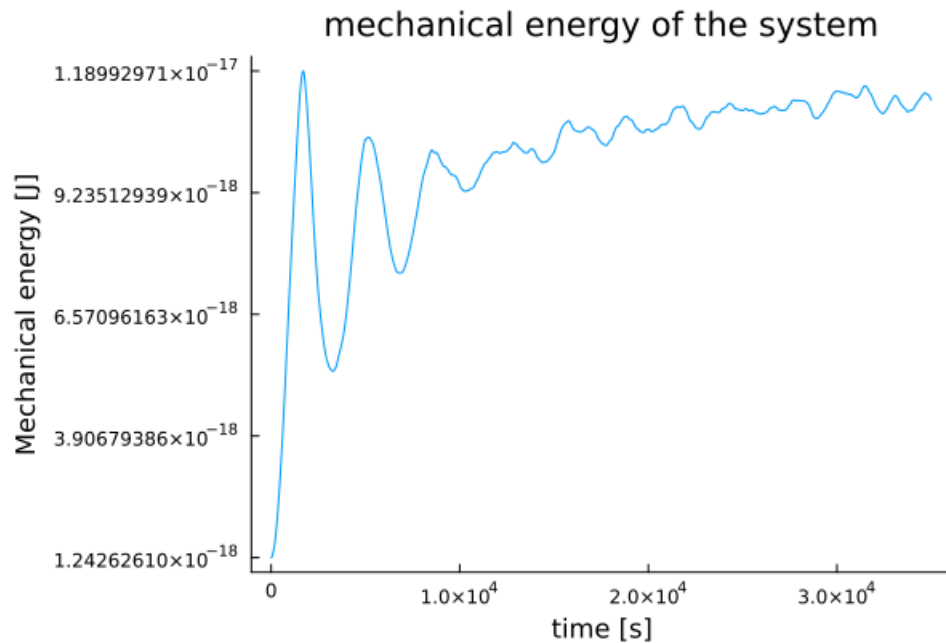

1.3 Densité

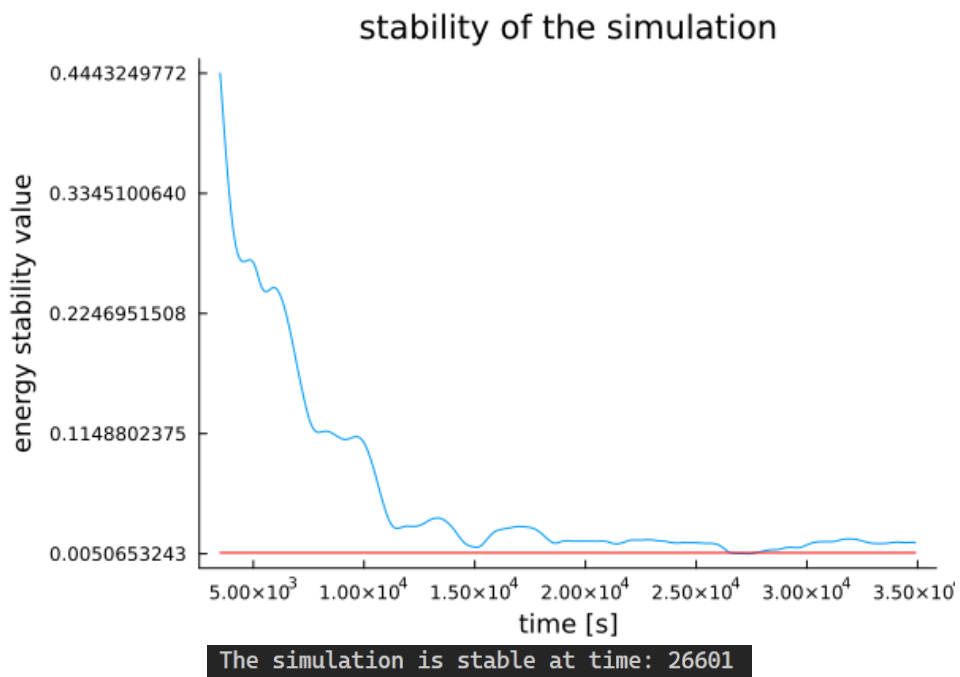

1.4 Quantité de mouvement totale.

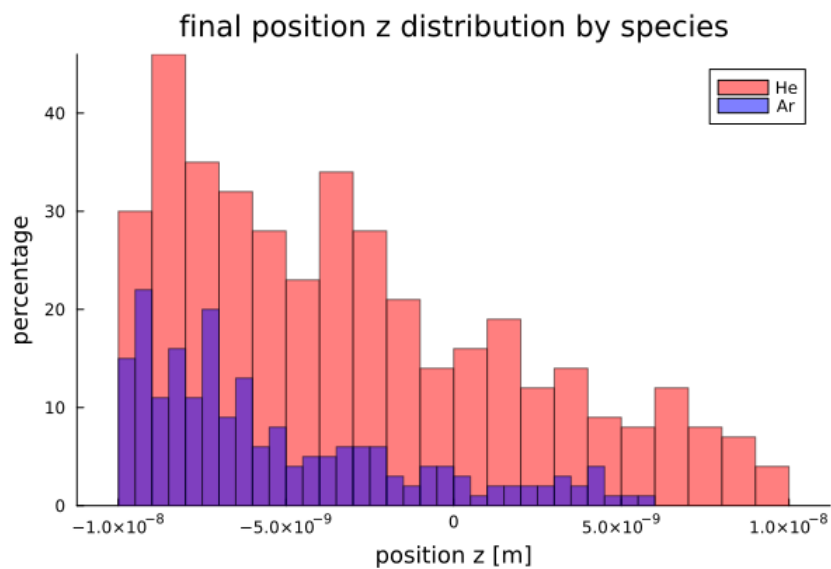

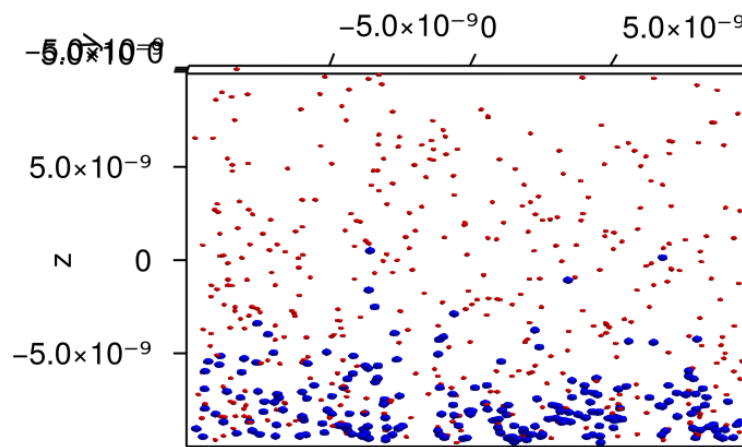

1.5 Energie mécanique

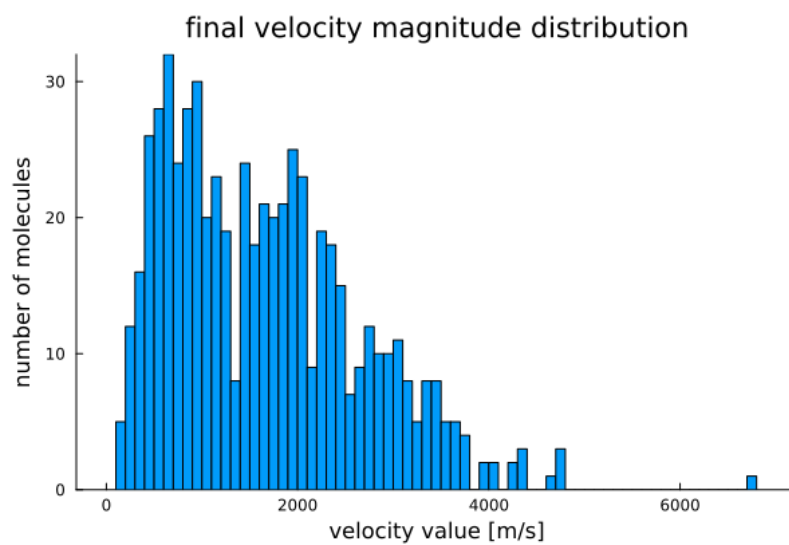

1.6 Stabilité de la simulation

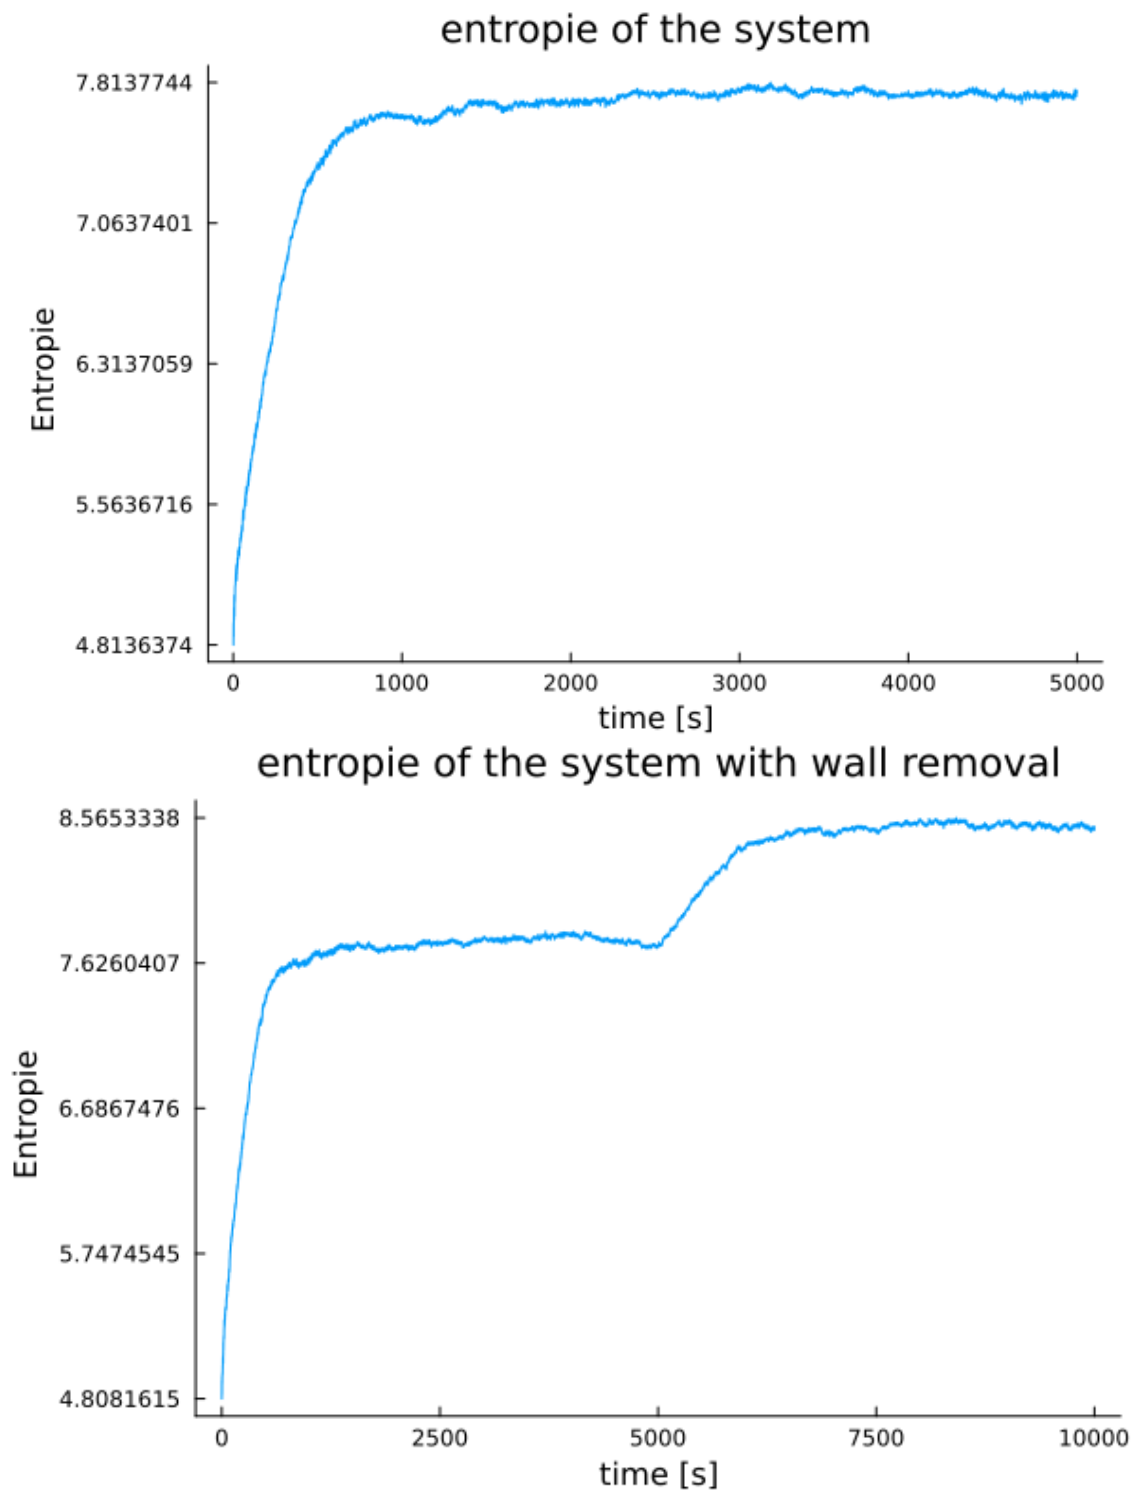

1.7 Séparation entre les types de molécules

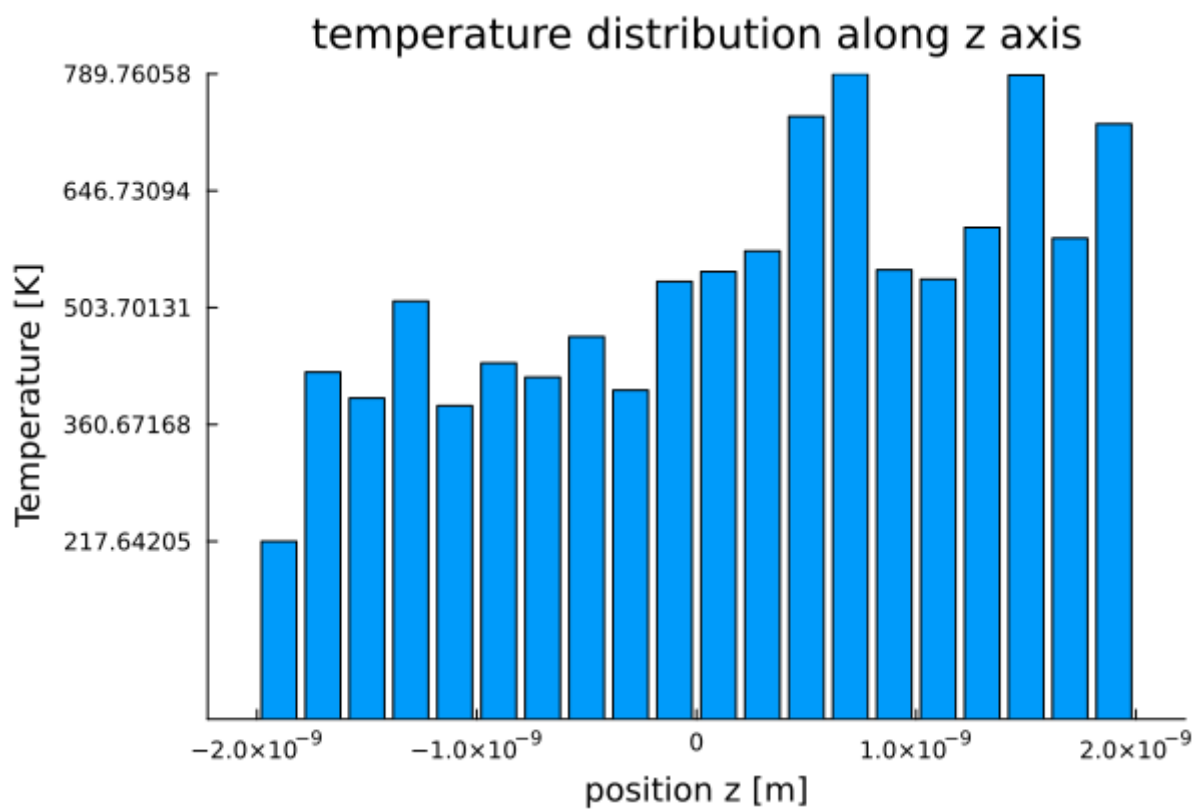

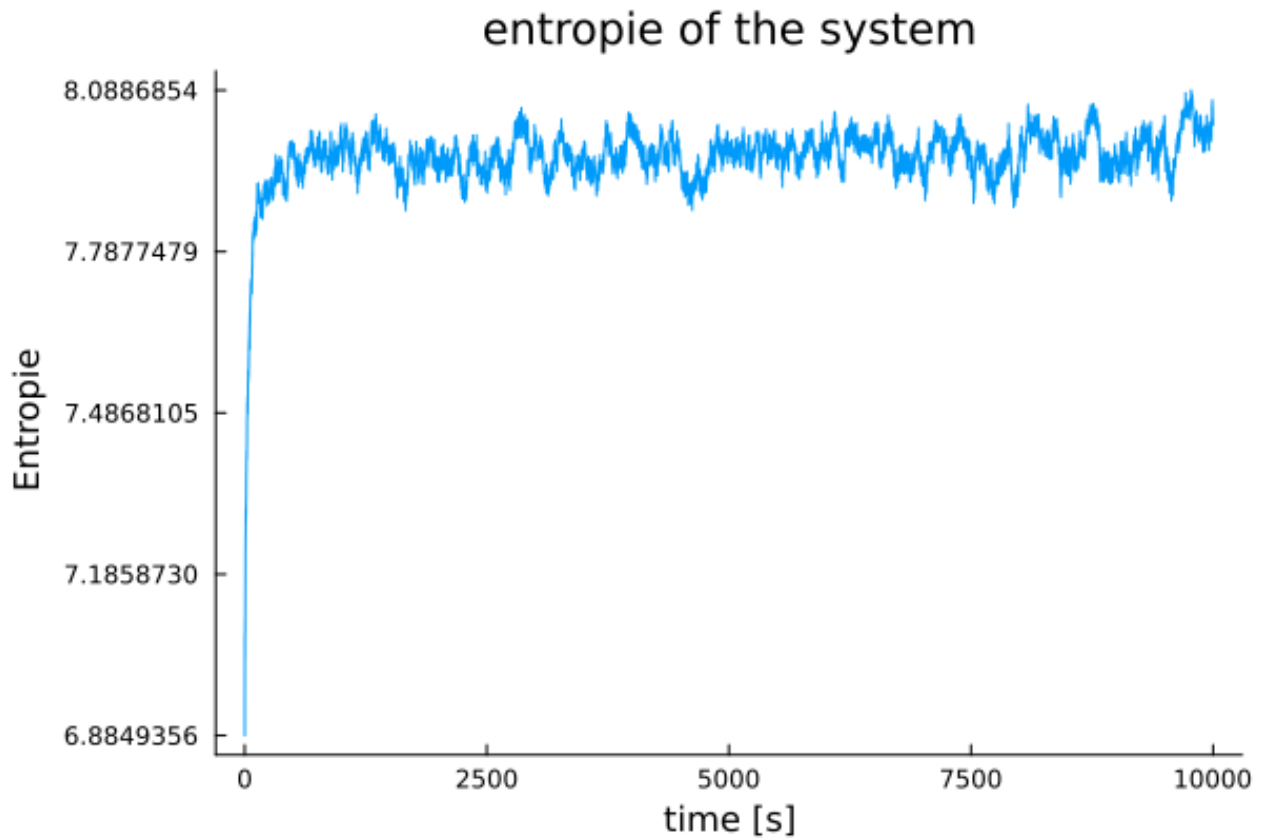

1.8 Distribution des vitesses

2. Entropie

3. Gradient de température

4. Gaz réels
